

ACKNOWLEDGEMENTS

We would like to thank our advisory committee members for all their assistance and valuable insight. Personnel associated with the Albemarle-Pamlico Estuarine Study were especially supportive and helpful. We also appreciate all the time and information provided by the respondents from both the telephone and in-person interviews. Dr. Yevonne Brannon and the staff of the Center for Urban Affairs at NCSU provided expert service in collection and processing of the telephone survey data. We also acknowledge the professional competence and support of our secretaries Tammy Hinton and Judy Cline. Support from the NCSU Department of Sociology, the NCSU College of Agriculture and Life Sciences, and the UNC Sea Grant Program are appreciated.
